

# Radon Mitigation Fan

Radon mitigation fans are used with under-floor extract and ventilation systems designed to remove the gas from underneath the floor of a house and vent it into the atmosphere through a pipe.

Radon is measured in becquerels per cubic meter of air ( $\text{Bq m}^3$ ) and the Health Protection Agency (HPA) has set the UK Action Level for radon at  $200 \text{ Bq m}^3$ . Most homes in the UK have radon of around  $20 \text{ Bq m}^3$ . Above  $500 \text{ Bq m}^3$  a radon sump fan installation is usually required.

Airtech radon mitigation fans are effective above  $500 \text{ Bq m}^3$  levels of contamination.

## ORDER CODE

**RMF150** Radon mitigation fan

## Special features

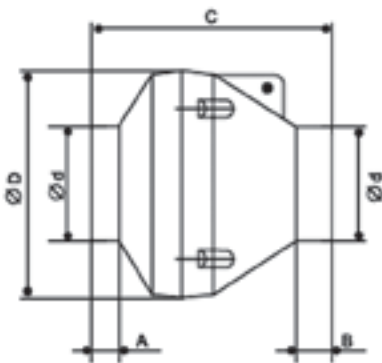

- Integral speed control
- IP65 rated for external use
- Thermal overload protection
- Anti-vibration flexible connector available

## General

- Robust non-corrosive casing
- Ball bearing motor

## Benefits

- Easy to install
- Low noise
- Excellent for long runs

## DIMENSIONS

Code	od	oD	C	A	B
UT150/SC	150	300	286	30	30
